

EnCBAM by EncarbonSys

Your Partner for CBAM Compliance – Accurate, Automated, Audit-Ready

About EnCBAM

EnCBAM is the specialized compliance engine from EncarbonSys, built to help exporters and manufacturers meet the EU Carbon Border Adjustment Mechanism (CBAM) requirements with confidence.

With October 2025 marking the next key milestone for CBAM declarations, and mandatory quarterly reporting beginning January 2026, the urgency is real: late or inaccurate submissions can mean fines, shipment delays, or even blocked market access.

EnCBAM takes away the complexity by providing done-for-you, EU-ready reports that are accurate, timely, and compliant with the official formats.

CBAM Deadlines You Can't Ignore

31 October 2025

Last quarter of transition phase
CBAM declaration deadline

31 January 2026

Carbon taxation and mandatory
quarterly reporting begins

What We Offer

CBAM Compliance Report Generation1

- Accurate calculation of product-level emissions
- Automated preparation of official PDF reports
- Generation of EU-compliant XML files for direct submission

Why It Matters: Saves you from manual spreadsheet errors and ensures your company is submission-ready before regulators ask.

Emission Factor Application & Estimation2

- Product-based emission estimates using standardized datasets
- Supplier data integration where available
- Gap-filling methods aligned with EU's default emission factors

Why It Matters: Even if you lack full supplier data, EnCBAM ensures your report is complete, consistent, and defensible.

Structured Advisory & Guidance3

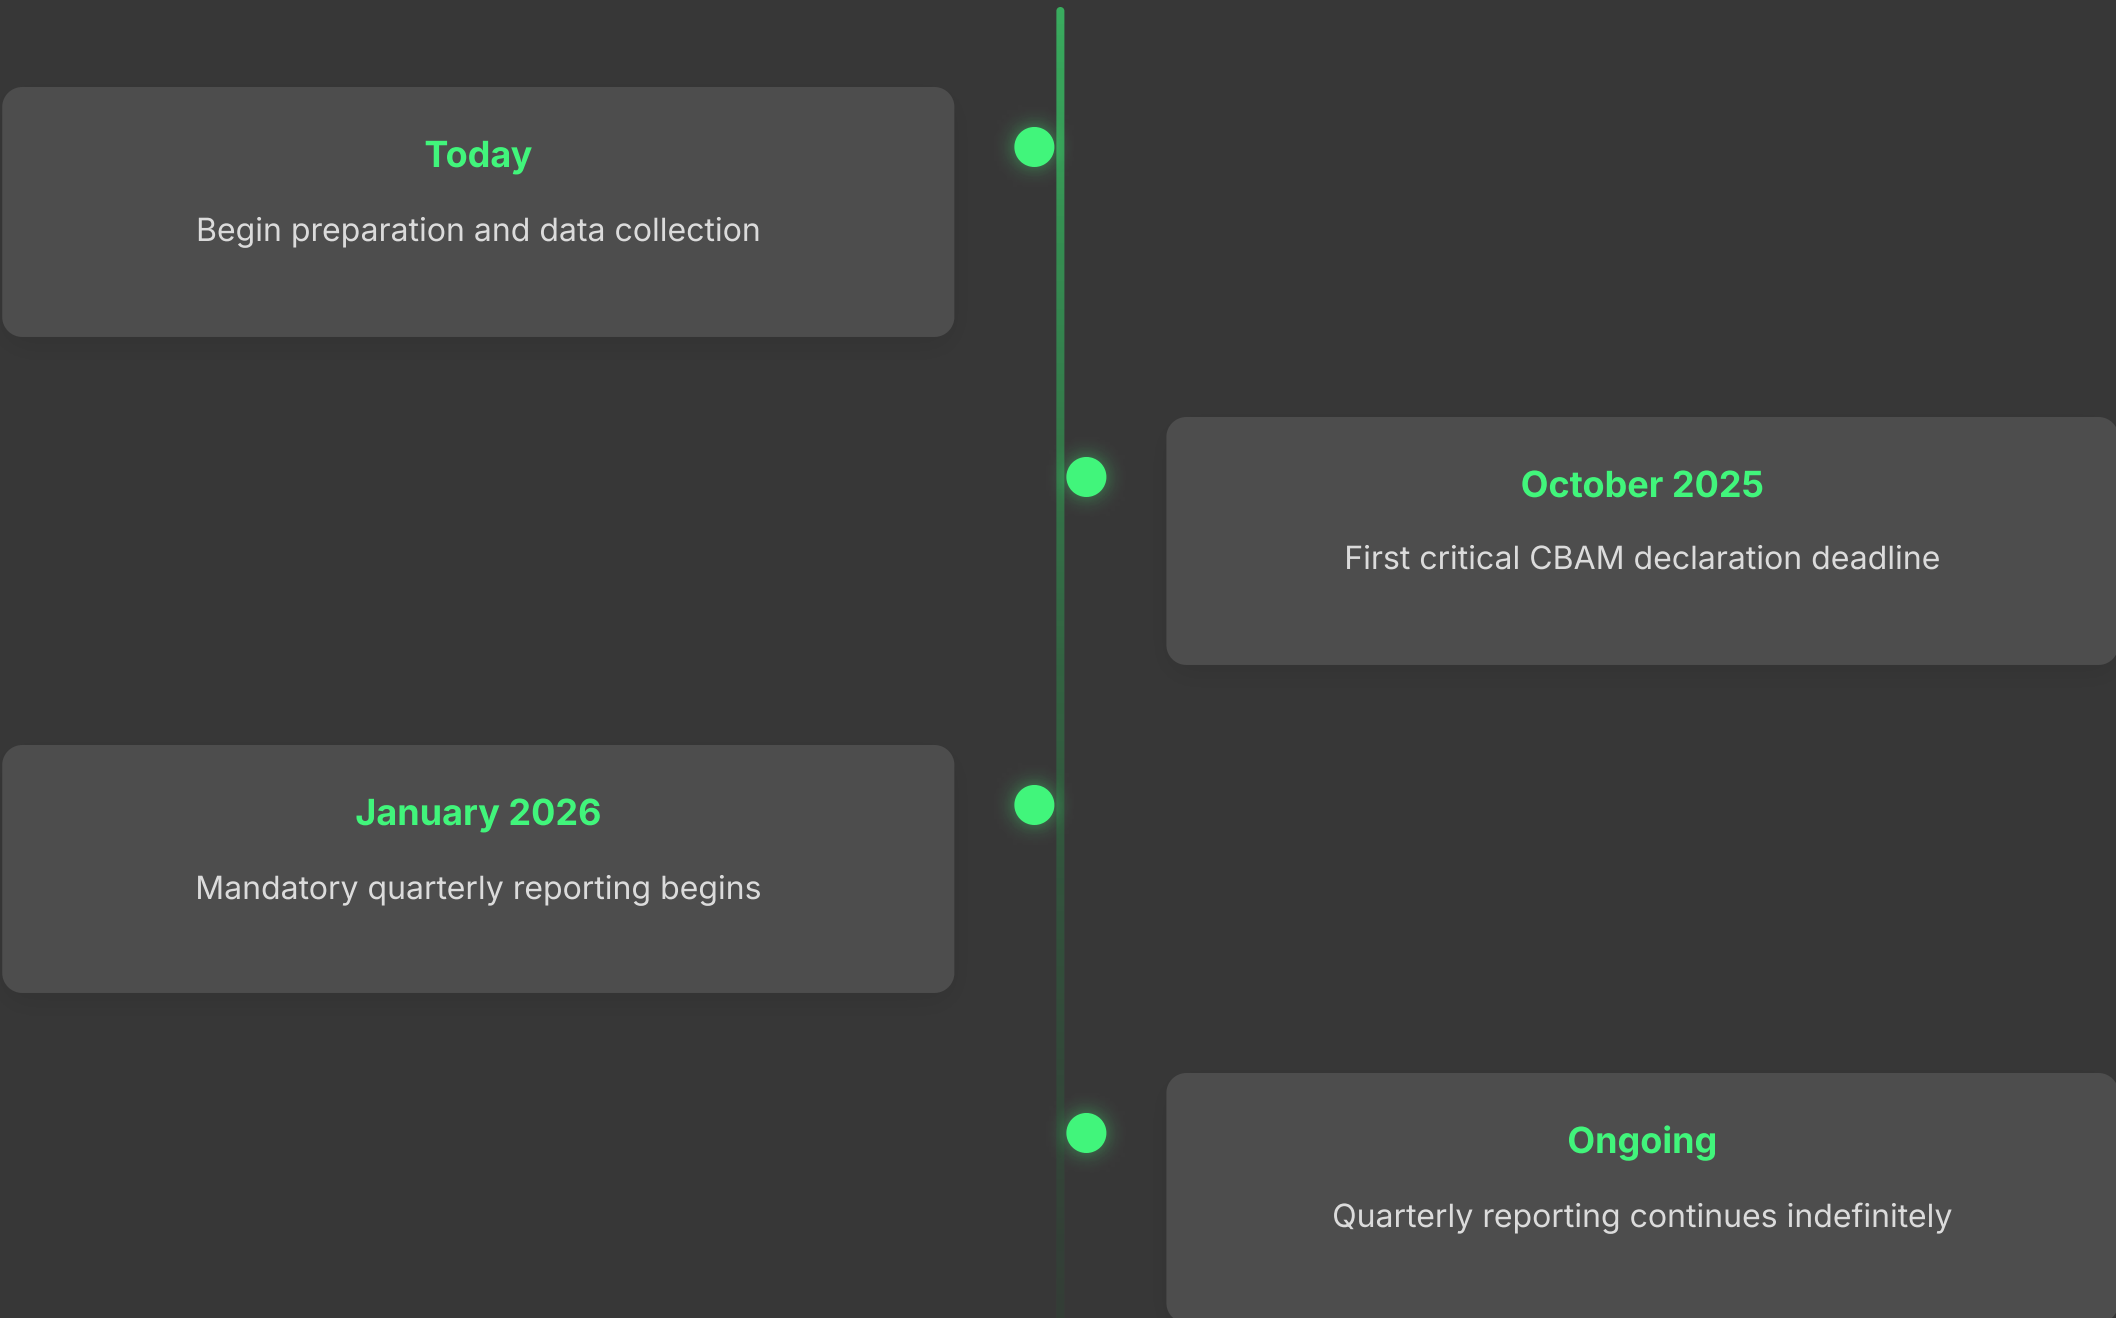

- Step-by-step compliance roadmap
- Support in preparing internal data for CBAM submissions
- Expert insights on aligning with ISO 14064 / 14001 environmental standards

Why It Matters: Avoid costly mistakes by getting expert validation and a clear compliance pathway.

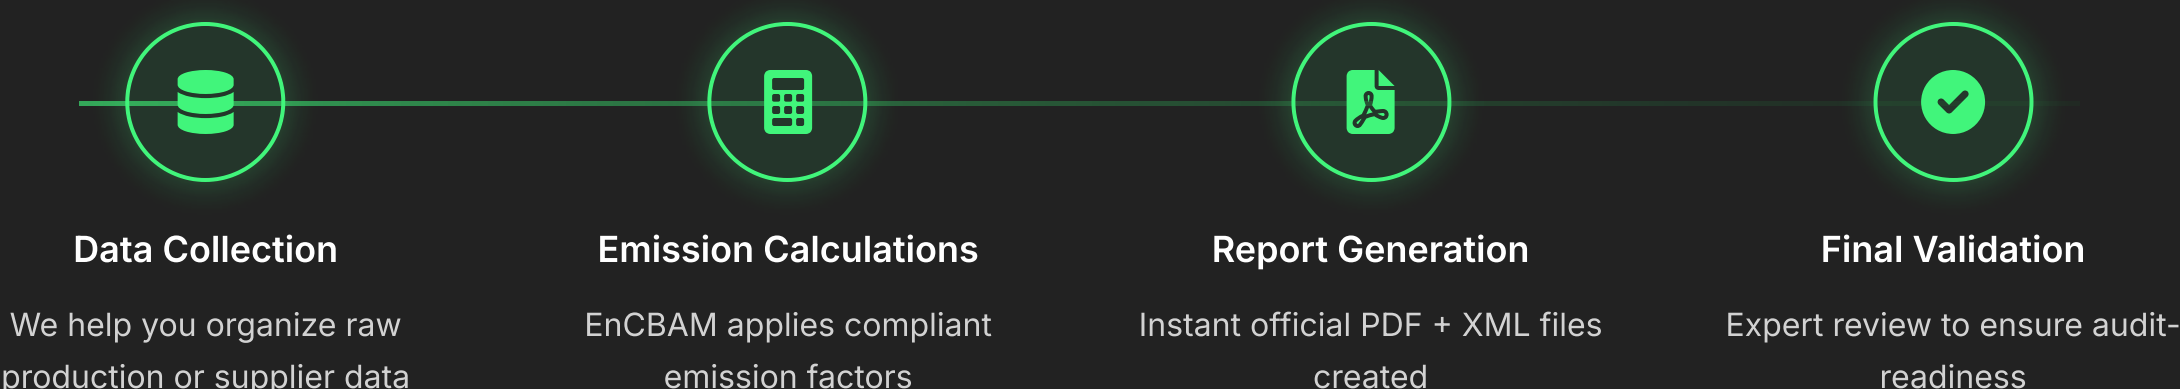

Why Act Now?

- October 2025:** First critical CBAM deadline → delayed or missing data can block EU shipments.
- Jan–Mar 2026 (Q1):** Full quarterly reports start → regulators expect precision, not excuses.
- Non-compliance risks include:** fines, reputational loss, and disrupted trade contracts.
- EnCBAM gives you the peace of mind that your submissions are ready, accurate, and on time.

CBAM Compliance Timeline

Our Process

Who Needs EnCBAM?

- Exporters to the EU**
Steel, aluminum, cement, fertilizers, electricity, hydrogen, chemicals
- Industrial Suppliers**
Supporting EU-facing businesses
- SMEs**
Seeking low-cost, reliable compliance without in-house experts

Take Action Before It's Too Late

CBAM isn't optional. By October 2025, the EU will expect declarations. By January 2026, quarterly reporting is mandatory.

You cannot afford delays. Every quarter missed = regulatory fines, blocked access, lost contracts.

EnCBAM ensures you stay ahead — with clear, accurate, ISO-aligned compliance reports delivered on time.

Secure Your CBAM Compliance with EnCBAM
